

SERVICES FOR THE OIL AND GAS INDUSTRY

BMT Cordah Limited

BMT Cordah understands your need for practical, sustainable environmental performance, whether to meet legislative requirements, your own company goals or those of your clients. Our support can operate at any level in your management and at any stage in project life-cycle. From the development of policy and strategy, through EMS preparation and implementation, to audit and accreditation, we provide focused, experienced advice and pragmatic solutions.

Management Services:

- **Policy and strategy development**
- **Environmental reporting**
- **Data evaluation and review**
- **Risk and liability assessment**
- **Environmental management systems**
- **Environmental auditing**
- **Evaluation of regulatory requirements and environmental legislation**

Stakeholder Analysis

Support to management to determine the expectations of key influential stakeholders. Subsequent to analysis, stakeholder expectations are incorporated into the organisation's environmental strategy and policy.

Design and Development of EMS

Support for the integration of environmental management into existing business processes to minimise system complexity and devolve responsibility.

EMS Implementation

Support through awareness raising and training programmes to facilitate the introduction of new working practices.

System Maintenance Services

System administration to facilitate internal control and the achievement of business and environmental improvements. Provision of services in auditing, performance reporting and business and environmental legislation up-dates.

Services for the Oil & Gas Industry

BMT Cordah routinely works with project and asset teams on individual assignments, exploring in detail the environmental performance, effects and implications of both new and existing developments onshore and offshore. Close liaison with team members, technical knowledge and industry-specific experience means that we can make significant contributions. We assess environmental impacts, prepare environmental statements, compile information in support of planning applications, calculate energy use and gaseous emissions and to help identify the BPEO.

Project and Development Support

- **Environmental assessments and screening**
- **Preparation of environmental impact assessments and environmental statements**
- **Preparation of oil-spill contingency plans**
- **Benthic surveys at drilling sites and offshore surveys to determine pollutant effects on marine biology**
- **Physical, chemical and biological analyses to assess potential pollution impacts**
- **Research on the fate and effect of drill cuttings piles**
- **Analysis and prediction of marine fouling**
- **Auditing projects, production platforms, drilling rigs, contractors and onshore petro-chemicals facilities**
- **Training in environmental management and auditing**
- **Studies on platform decommissioning**
- **Preparation of BPEOs for decommissioning platforms and pipelines**

BMT Cordah routinely works with project and asset teams on individual assignments, exploring in detail the environmental performance, effects and implications of both new and existing developments onshore and offshore. Close liaison with team members, technical knowledge and industry-specific experience means that we can make significant contributions. BMT Cordah is retained as an environmental advisor by operating and contracting companies, and is a recognized provider of international environmental training.

BMT Cordah has conducted numerous statutory environmental assessments on oil and gas projects. Our projects include field developments, exploration and production drilling; export pipelines in marine and terrestrial environments; terminals and infrastructure. In addition, we have carried out major decommissioning projects on redundant offshore facilities, including BPEO's for technically complex structures with significant sea-bed deposits of drill-cuttings.
