

“Where will our knowledge take you?”

Waste Management Services

Practical Waste Management to facilitate legislative compliance and cost control

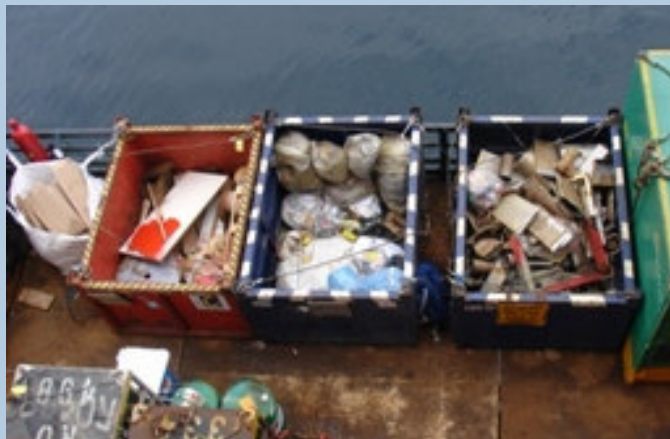

Waste Management Services

BMT Cordah offers a range of Waste Management Services to support the planning and management of Oil and Gas operations, projects and decommissioning activities. These include:

- Waste Management Reviews
- Waste Management Plans
- Waste Inventories
- Tracking Waste Transfers and Disposal
- Waste Management Procedures
- Legislative Compliance Auditing, such as Duty of Care
- Audits of Waste Contractors
- Waste Awareness Training

Our Clients Include:

Shell U.K. Limited
Talisman (Energy) UK Limited
Smith Services

All waste producers have a legal “Duty of Care” to ensure that their waste is properly stored, handled, transferred and disposed of.

As an established consultancy with more than 30 years supporting the Oil and Gas industry, we understand both the practical constraints and legislative issues associated with the management and transfer of offshore wastes.

Our experienced consultants work closely with the Client to provide a practical and high quality service, applying our knowledge to seek innovative solutions to individual waste problems. Support can be provided at the Client’s onshore and/or offshore premises, and regularly involves:

- Working closely with operations and project engineers
- Providing day-to-day waste management advice and support
- Consulting with regulatory authorities, conservation bodies and other stakeholders
- Carrying out field and desk-top research
