

GOVERNMENTS AND INTERNATIONAL FUNDING AGENCIES

BMT Cordah Limited

BMT Cordah provides management support and consultancy services focused on improving the capacity of governments, government agencies and international development assistance organisations to achieve sustainability in their decision-making process. These services result in recommendations or solutions to issues and problems arising from most of the significant interactions of development and the environment.

Management Services:

- Needs / constraint analyses
- Policy and strategy formulation
- Mainstreaming sustainability or environmental considerations into agency operations and development programmes
- Analyses and evaluation of institutional frameworks for improving performance

BMT Cordah combines three basic, but critical elements in its approach; analysis of client needs and constraints, best international practice, and a deep understanding of the current priorities of the international development agenda. These elements are combined to produce a set of outputs (from recommendations to manuals/guidelines to training outcomes) that are coherent with policy, existing capacity and likely to be effective.

Our services cover all aspects of project life-cycle (from environmental assessment to implementation of environmental management systems), advice on emissions, and surveys, to establish the presence and importance of environmental components.

Project Life - Cycle Support Services:

- Project and site identification
- Environmental or sustainability assessment
- Advice on permitting and approvals
- Stakeholder analysis and consultations
- Monitoring and evaluation of performance

The goal in all our work is to seek to ensure that developments are sustainable and adverse impacts are minimised and opportunities enhanced. Two fundamental principles guide our work; first, to achieve this goal cost-effectively and secondly, to do so whilst maintaining full stakeholder input.

Government and International Funding Agencies

Development has proceeded apace throughout the world and there is a legacy of environmental damage that is still continuing as a result of emissions of pollutants either routinely or due to accidents. BMT Cordah offers extensive skills in emission control and minimisation ranging from air quality improvements to oil spill containment and clean-up. Working with our clients, BMT Cordah strives to ensure that environmental damage is minimised and improvements occur, as cost-effectively as possible.

Advice on emissions & solid waste generation & management:

- Air dispersion modelling
- Air quality management
- Wastewater minimisation
- Oil spill assessment, control and clean-up
- Solid waste management

BMT Cordah conducts quantitative modelling to assess the ecological and/or health effects of atmospheric pollutants. We have an international reputation in assessing the sensitivity of coastal zones to oil pollution and in surveying the extent of impacts when spills occur.

Governments and agencies often need to know the key environmental characteristics of areas before formulating development strategies, programmes and plans. BMT Cordah has a particular strength in implementing surveys for all kinds of coastal, nearshore and offshore ecosystems around the world.

Survey, monitoring & analysis:

- Baseline data collection and interpretation
- Habitat sensitivity assessment
- Environmental trend and impact monitoring

BMT Cordah has undertaken ecological surveys of terrestrial, coastal and deepwater environments. These provide data for baseline studies, monitoring programmes and environmental management plans.

The name 'cordah' is derived from the Gaelic 'cordadh s'a'chruinne' which translates as 'harmony in the world' and signifies the company's Scottish heritage and its worldwide service

BMT Cordah provides a total environmental consultancy service capability for:

- The Oil Industry Worldwide
- Industry, Commerce and Public Sector
- Governments and Funding Agencies Globally

We have offices in Aberdeen, Edinburgh and London and working experience in UK, Europe, South & Central America, Africa, Middle East and the Asian Pacific.

BMT Cordah is part of British Maritime Technology (BMT), a leading multi-disciplinary engineering and technology consultancy. BMT's main markets are environmental, oil and gas, defence, transportation and casualty. BMT has offices throughout the UK and in Europe, North America and Asia.

BMT Cordah's aim is to provide practical, cost-effective and comprehensive solutions to environmental problems.
